Summary

Software Engineer with 3 years of experience building scalable microservices and RESTful APIs using Java, Spring Boot, and cloud platforms (AWS). Delivered measurable impact through 35% API response time improvement, 30% reduction in production bug recurrence, and 95% on-time sprint delivery. Proven expertise in backend development, system optimization, CI/CD automation, and Agile software development.

Technical Skills

Backend	Java, Spring Boot, Spring Security, Spring MVC, REST APIs, Microservices, Hibernate
Frontend	Angular, TypeScript, JavaScript, Bootstrap, Responsive Web Design, REST API Integration
Databases	MySQL, SQL, Query Tuning, Stored Procedures, Database Optimization
Cloud & DevOps	AWS (EC2, S3, IAM, RDS, Lambda), Docker, Jenkins, Maven, Git, GitHub, CI/CD Pipelines
Testing	JUnit, Mockito, Unit Testing, Integration Testing, Test-Driven Development
Concepts	Agile/Scrum, API Documentation, Performance Optimization, System Design, Technical Debt Reduction

Experience

Software Engineer <i>MetroTelWorks / Airtel</i>	Feb 2026 – Present <i>Gurugram, India</i>
---	---

- Developed and maintained scalable RESTful APIs using Java and Spring Boot for enterprise workflow and operational management systems.
- Improved API response time by 35% through SQL query optimization, caching strategies, and backend code enhancements.
- Designed backend microservices and optimized service communication for improved scalability and maintainability.
- Implemented asynchronous processing and backend optimizations to reduce service latency and improve system performance.
- Refactored legacy modules and improved code maintainability, reducing technical debt by 25%.
- Integrated backend services with AWS infrastructure and implemented secure authentication and access control mechanisms.
- Collaborated with frontend developers for seamless Angular integration and API consumption.
- Participated in Agile development lifecycle including feature development, debugging, testing, deployment, and release activities.
- Tech Stack: Java, Spring Boot, Microservices, REST APIs, MySQL, AWS, Jenkins, Docker, Maven, Git, Angular.

Software Engineer <i>Wipro</i>	Aug 2024 – Aug 2025 <i>Noida, India</i>
--	---

- Architected and deployed RESTful APIs using Java and Spring Boot supporting core business workflows for 100+ users.
- Optimized API performance by 35% through advanced query optimization, caching strategies, and efficient code design.
- Resolved critical production issues and improved system stability through backend optimizations and preventive fixes.
- Integrated backend services with GCP infrastructure including Cloud Storage, Cloud SQL, and Compute Engine.
- Refactored legacy modules reducing technical debt and improving maintainability.
- Collaborated with stakeholders to gather requirements and deliver scalable backend solutions.
- Developed testing documentation and enhanced onboarding support for development teams.

Associate Software Engineer (Contractual) <i>Vision India Services / MediaTek</i>	Apr 2024 – Jun 2024 <i>Noida, India</i>
---	---

- Built scalable microservices using Java and Spring Boot with JWT-based authentication and authorization.
- Developed responsive Angular UI components and integrated frontend modules with backend APIs.
- Integrated secure third-party REST APIs and optimized backend workflows.
- Optimized MySQL database performance using indexing, query tuning, and stored procedures.
- Established CI/CD pipelines using Git, Maven, and Jenkins.
- Achieved 80%+ code coverage through unit and integration testing using JUnit and Mockito.

Associate Software Engineer <i>KiwiTech</i>	Mar 2022 – Jun 2023 <i>Noida, India</i>
---	---

- Developed RESTful APIs and backend services reducing system latency by 10%.
- Implemented asynchronous processing and batch operations improving backend efficiency.
- Collaborated with business analysts and product teams to deliver scalable technical solutions.
- Participated in code reviews, debugging, and backend enhancements maintaining high code quality standards.
- Worked closely with frontend developers to integrate APIs with Angular applications.

Key Projects

eWAT (Enterprise Work Allocation Tool)	<i>Java, Spring Boot, MySQL, GCP / Wipro</i>
---	--

- Designed and developed internal platform for tracking production/non-production hours and task allocation for 100+ users.
- Implemented automated reporting modules with downloadable activity logs improving operational tracking.
- Created testing documentation and enhanced onboarding manuals for smooth project adoption.

MantelTop	<i>Java, Spring Boot, Angular, MySQL, JWT / Vision India</i>
------------------	--

- Built digital badge creation and exchange platform with secure user workflows and JWT authentication.
- Architected scalable backend services supporting real-time badge operations and collection management.

- Implemented RESTful APIs enabling seamless frontend-backend communication.

WalkSpan

Java, Angular, REST APIs, Location Services / KiwiTech

- Developed city exploration platform integrating real-time location and mapping APIs.
- Designed responsive Angular UI enhancing user engagement and platform usability.

Education

GL Bajaj Institute of Technology and Management	Noida, India
Master of Computer Applications (MCA), CGPA: 7.82/10	2020 – 2022
Kurukshetra University	Kurukshetra, India
Bachelor of Computer Applications (BCA)	2016 – 2019

Achievements & Certifications

- Best Performer Award (2023) for excellence in backend development and production support.
- AWS for Developers
- Programming Foundations: APIs and Web Services
- AWS Lambda
- Generative AI Productivity Skills (Microsoft & LinkedIn)
